Sectional Doors

Why choose Doherty & Bolger?

- In operation for 20 years our company foundations have been built on referral and repeat business
- We offer the best value for money in terms of quality of product, workmanship & service
- All our garage doors carry the performance and safety assurance of a CE mark
- Should you require it, we pride ourselves on our after sales service

Sectional Garage Door Range

The sectional garage door offers outstanding performance in all weather conditions. Constructed from double skin steel sections, the panels are filled with dense insulation which minimises the heat loss through your door.

The strength of the panel, along with full perimeter and joint seals, gives exceptional protection against wind and rain ingress whilst also ensuring superior levels of insulation. This is particularly important if your garage is attached to your house.

Our range of styles, windows and colours will ensure you find the perfect design for your home. With 42mm sections giving a U-value of 0.51 W/M2k the sectional garage door offers the highest levels of insulation. While available in certain colours as standard each style of door can be custom painted to any RAL or BS colour.

There's a style for every home!

Roller Doors non insulated

The most popular garage door on the market, the non insulated roller door is ideally suited for stand alone garages where insulation and draught proofing are not a priority. GDS use the highest quality pre-finished steel with a deeply swaged, square profile design to produce the ultimate roller door with a 10 year warranty on Plastisol finishes. All doors are made to measure and available in 14 colours.

Roller Doors insulated

The insulated roller door comes fully automated as standard and is made up of insulated aluminium lathes. The powder coated guides are brush lined to keep the elements out and ensure smooth operation with no metal to metal contact. A multi-point auto locking system uses the positive force of the operator to ensure excellent security against forced entry when in the fully closed position. As standard the door comes with two handsets and a canopy to neatly house the roll. A safety edge is also available as an optional extra.
